- D. Press corrector A, until actual date is displayed
- E. Press corrector B, until actual weekday is displayed
- F. Set time, if not already done under point C.

Details: See *Instruction Manual*

General instructions

Removing the setting stem can only be effected in position I.

The use of supporting screws is essential when mounting the hands.

Permitted hand setting strengths:

Hr. / min. hands:	<40N
Other hands:	<30N

The moon disc must not be adjusted other than by the stem. Any direct manipulation of the moon disc leads to loss of the holding force and thus will strongly impact the function.

Blocking period

During the blocking period between 22:00 and 5:00 hrs automatic changes are in progress. It is not allowed to activate the pushers A or B (quick-correction of date, day of the week) during the blocking period. Pressing the pusher during this period may cause malfunctions in the movement.
